

OUR SUSTAINABILITY GOVERNANCE FRAMEWORK

Viterra has created a sustainability governance framework that defines sustainability roles and responsibilities within our Company. This framework helps us to coordinate our efforts and understand how we fit together as a team as we create and implement our strategic sustainability plans.

Viterra's Sustainability Working Group identifies sustainability issues, strategies and goals, and works to develop and implement solutions. This group is led by Viterra's Director of Sustainability, who spearheads cross-functional initiatives and provides coordination, communication, and sustainability intelligence throughout the Company. Individuals in our Operating and Enabling Divisions work with the Sustainability Working Group to develop and implement programs and initiatives that are within their areas of responsibility.

The Sustainability Working Group also reports to The Sustainability and Brand Executive Committee, which oversees Viterra's direction, strategy and policy on Sustainability and makes sure that our organizational activities align with our sustainability efforts and goals.

Ad Hoc Committees are formed to address specific issues as they arise.
