

XCEED[®] VT Oasis CL

Clearfield Open-Pollinated

XCEED[®] VT Oasis CL canola, from Viterra's breeding program is an exciting crop option for the brown and dark brown soil zones. XCEED[®] VT Oasis CL produces canola-quality oil, and its inherent traits offer improvements over traditional canola varieties in this target geography.

The XCEED[®] VT Oasis CL Advantage:

Viterra's canola breeding program identified that Brassica juncea has many traits that help with yield stability. In fact, many canola breeding programs are trying to obtain the traits already inherent to XCEED canola including:

- Increased tolerance to frost, heat, and drought
- Reduced green seed, resulting in improved seed quality
- Increased pod shatter resistance, providing the opportunity to straight-cut combine the crop

XCEED[®] VT Oasis CL canola allows producers to grow canola in areas not typically suited to traditional canola varieties and is targeted to the brown and dark brown soil zones.

Yield	107% of XCEED VT 8571 CL
Lodging	Excellent
Maturity	3 days earlier than XCEED VT 8571 CL
Height	Slightly shorter than XCEED VT 8571 CL
Disease package	R to Blackleg R to Fusarium Wilt

XCEED VT 8571 CL - Maturity 101 days (2008-2009 data). Height 117 cm. All products listed are trademarks of their respective companies

XCEED[®] VT Oasis CL canola is available through Viterra with a production contract.
