

**For Immediate Release**

Date: February 01, 2011

Adelaide, Australia

Listed: TSX:VT: ASX:VTA

**Viterra launches new Australian website**

Global agribusiness Viterra has launched a new website for its Australian business, accessible at [www.viterra.com.au](http://www.viterra.com.au).

With rural communities gaining faster and more reliable internet access, Viterra is pleased to offer a fresh, user-friendly online experience. The new website reflects the company's commitment to providing users with up-to-date, easily accessible information.

Whether accessing information about Viterra's business, statistics about shipping, daily grain pricing, or current career opportunities, the new website is easy to navigate and use.

The Australian website has been built as part of Viterra's global website format to support the company's growing international presence, and with direct links to its other sites, Viterra's new Australian site also provides users with easy access to investor and shareholder information.

Website visitors can make full use of the information available including regularly updated publications such as Grain Business magazine and harvest reports.

In addition to updating the Australian website, the company has also recently completed a refresh to its ezigrain website, at [www.ezigrain.com.au](http://www.ezigrain.com.au). The functionality of the site remains the same, however, the new look provides a cleaner interface.

**About Viterra**

Viterra provides premium quality ingredients to leading global food manufacturers. Headquartered in Canada, the global agribusiness has extensive operations across Western Canada, North America, Australia and New Zealand. The company's growing international presence also extends to offices in Japan, Singapore, China, Vietnam, Switzerland, Italy, Spain, Ukraine, Germany and India. Driven by an entrepreneurial spirit, Viterra operates in three distinct businesses: grain handling and marketing, agri-products, and processing. Viterra's expertise, close relationships with producers, and superior logistical assets allow the company to consistently meet the needs of the most discerning end-use customers, helping to fulfill the nutritional needs of people around the world.
